Introduction

This booklet has been produced by the West Midlands Obstetrics and Gynaecology Trainees committee with the aim of providing some basic information about the different hospitals within the West Midlands. The booklet may be useful when selecting future hospital placements. All information included has been updated to the best of our knowledge at the time of publication and is subject to change by August 2023. Many thanks to the college tutors who helped to update this guide. Units where no updates have been provided for 2023 (Please check notes in red under Unit name) have still been included but the information provided may not be completely reliable. Specific enquiries should be directed to the college tutor of the unit.

Every year we fill in numerous surveys about our training, education and the units we work in. All of the data from these are publicly available and very easy to access and make for very interesting reading. It's all quite self-explanatory and relatively easy to navigate and with some filtering of results you can see really well how units measure up in many different domains e.g., induction, facilities, workplace behaviours, handover etc., against each other and against the national average. This is very useful information when deciding on where you may want to rotate depending upon your individual training needs.

HEE National Education and Training Survey (NETS) reporting tool: [Click here](#)

RCOG Training Evaluation form (TEF): [Click here](#)

GMC National Training Survey (NTS) reporting tool: [Click here](#)

A summary diagram of Indicator 12 (overall recommendation) has also been included from the RCOG trainee evaluation form (TEF 2021). The legend for these is in the diagram below.

The booklet also includes the contact details for all Hospital College Tutors who can be contacted directly for a specific query or clarification.

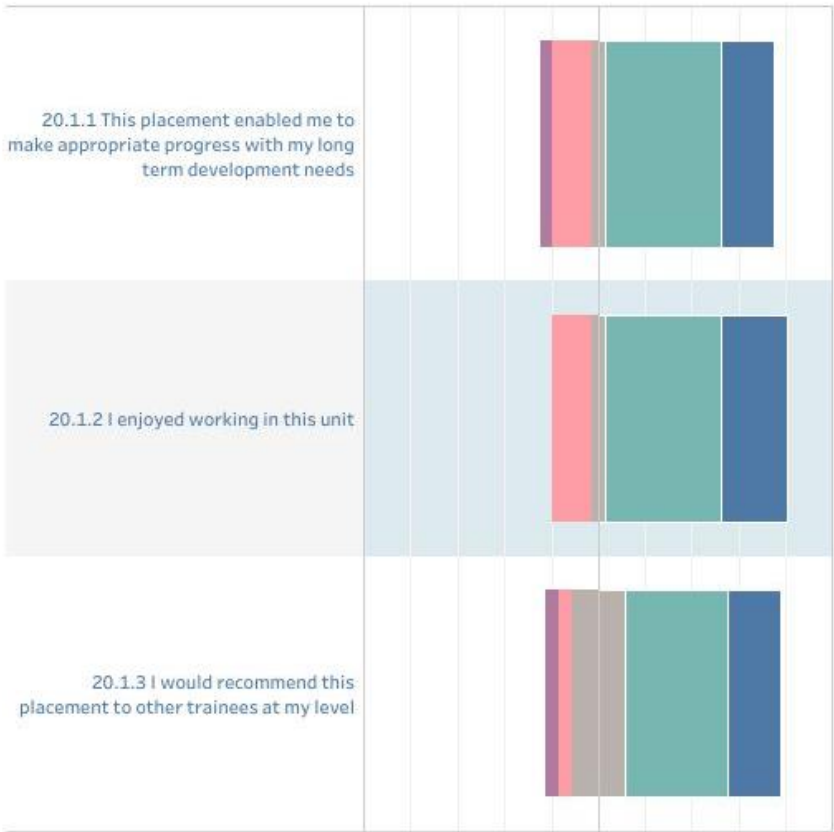

We would urge you all to read the rotations policy and placements forms 1 and 2 carefully. Whilst the rotations committee take a lot of time to allocate trainees to hospitals, it is not possible for them to accommodate everyone's first choice (or even third choice at times). Unfortunately, if all the hospitals you have selected are full prior to allocating your post, you will be placed where gaps remain at your level. Please be realistic in your choices and put 3 different hospitals down to stand the highest chance of getting a rotation of your choice. Please be assured that the rotations policy is strictly adhered to. Trainees should NOT approach individual College tutors asking to be placed at their units or ask College tutors to ensure they are placed at their units by emailing the rotations committee. Attempts to bypass the rotations policy in this fashion by trainees will be viewed negatively by the rotations committee.

Dr Zeyah Sairally, West Midlands O&G Trainees Co-Chair

Birmingham Women's Hospital

Hospital	Birmingham Women's Hospital
Address	Mindelsohn Way, Edgbaston, Birmingham, West Midlands, B15 2TG
Transport/parking	Walking distance from University train station Adequate parking normally but reduced due to demolition of Norton Court, can be difficult to get parking if arriving after 8am and before 1pm, very difficult to get parking on surrounding streets after 8am.
College tutor	Mr Aamir Khan aamir.khan9@nhs.net
ATSMs/ ASMs offered (please cross check with ATSM matrix)	<p>Gynaecology <u>Benign abdominal Surgery: open and laparoscopic</u> Supervisors: Y. Afifi, J. Clark, J. Gupta</p> <p><u>Urogynaecology and Vaginal Surgery (ATSM + SST)</u> Supervisors: M. Parsons, P. Lathe, (Phil Tooze-Hobson for SST)</p> <p><u>Sub fertility and Reproductive Health (ATSM+ SST)</u> Supervisors: R. Singh, Y Afifi, Y Jeve (L. Robinson for SST as well)</p> <p><u>Oncology</u> Supervisors: P. Abedin</p> <p><u>Acute Gynaecology & Early Pregnancy</u> Supervisors: J. Clark, J. Gupta, I. Hassan, R. Singh, A. Khan</p> <p><u>Advanced Laparoscopy for the excision of benign disease</u> Supervisors: Y. Afifi</p> <p><u>Colposcopy</u> Supervisors: N. Qureshi, J. Byrom</p> <p><u>Benign gynaecological surgery: hysteroscopy</u> Supervisors: J. Clark, J. Gupta, I. Hassan, P Smith</p> <p><u>Menopause</u> Supervisors: L Robinson</p> <p><u>Paediatric & Adolescent gynaecology</u> Supervisors: P. Lathe</p> <p><u>Vulval Disease</u> Supervisors: J. No. Deliveries/year	8359 deliveries / year – 1470 birth centre, 6889 delivery suite A 23-bed delivery suite consisting of a co-located midwife-led birthing centre, consultant-led labour ward, induction of labour ward, maternal high dependency unit and 2 operating theatres alongside 75 antenatal and postnatal beds.
Rota details	<p>2 tier registrar rota 1:10, SHO rota 1:14 Lower tier ST3-5 (Reg), Upper tier generally ST6-7 (Senior Reg) A number of posts are held by academic clinical fellows/lecturers Normal working day 8am – 5pm (SHOs also do a ward cover twilight 1pm to 9pm) Long day 8.30am – 9pm (SHOs also do a ward cover 8.30am to 5pm weekend shifts) Night 8.30pm – 9am</p>
Consultant cover	<p>For obstetrics - consultants are resident Monday-Wednesday 24/7, other days until 10.30pm/weekend on call For gynaecology - separate consultant resident 8-5pm then on call from home</p>
Specialist skills/clinics available	<p>Gynaecology</p> <ul style="list-style-type: none"> • Reproductive Medicine/ Genetics/ DSD/ Endocrinology and Fertility surgery • Endometriosis centre/advanced laparoscopy • Recurrent Miscarriage • OASIS – perineal clinic • Urogynaecology/ VUDs • Colposcopy • Out-patient Hysteroscopy • Ambulatory Gynaecology • Acute Gynaecology • Specialist endometriosis / pain clinics • Menopause clinics • Paediatric and Adolescent gynaecology • Later gestation TOPs and TOP clinic • Sexual Dysfunction Clinics (with Specialist Nurse Sue Elkin) <p>Obstetrics</p> <ul style="list-style-type: none"> • Maternal medicine – Consisting of joint UHB/BWC clinics to manage diabetes, endocrine disease, cardiology, perinatal mental health, haematology, renal disease, rheumatology, immunology, neurology, epilepsy, drug and alcohol issues, teenage pregnancy and HIV • Pre-pregnancy counselling • Supra-regional Fetal Medicine Centre <p>Additional Resources</p> <ul style="list-style-type: none"> • Neonatal Intensive Care Unit – Level 3 • Academic Department • Specialist perinatal pathology • Regional genetics • Gynae specialist radiology department • Educational resource centre – Women's health library • Simulator training – ultrasound, laparoscopic
Ultrasound training opportunities – number of trainees that can be accommodated for	<p>USS Simulator ATSM in early pregnancy and acute gynaecology ATSM in fetal medicine Scan training slots – DAU/ EPAU/ Radiology Local USS Educational Supervisor: Miss Shireen Meher (Fetal Med)</p>

Obs/Gynae intermediate scanning	2 intermediate gynae ATSM trainees and 2 intermediate obstetric ATSM trainees per year – Advance notice required to plan training capacity around workload
Gynaecology	40 beds– 2 gynaecology wards, can have Gynaecology HDU beds
Clinics at other sites	All clinical activity takes place at BWH, with the exception of some specialist joint consultant-led clinics at UHB – they may be of interest to specific ATSM trainees (i.e. maternal medicine, urogynae, advanced lap) and attendance at these specialist clinics can be discussed (and arranged) with the ATSM supervisor.
TEF Indicator 12: Overall recommendation	<p>Indicator 12 – Overall recommendation: 68.98</p> <p>Rank: 8</p> <p>N: 18</p> <p><u>Underlying questions to Indicator 12 – Overall recommendation (will not appear if N is small)</u></p>  <p>20.1.1 This placement enabled me to make appropriate progress with my long term development needs</p> <p>20.1.2 I enjoyed working in this unit</p> <p>20.1.3 I would recommend this placement to other trainees at my level</p>
Quote from the college tutor	<p>“The Women’s Hospital is an intensely busy but clinically and educationally rewarding place to work due to the complexity of the obstetric & gynaecological patients and the effective multi-disciplinary team-work and pro-training/supervising ethic amongst the hospital staff. The education team (in collaboration with service management) try their best to ensure your weekly working pattern reflects your educational requirements and special interests. We look forward to welcoming you within the supportive environment at BWH!” – Mr Aamir Khan</p>

Good Hope Hospital

To be read in conjunction with Birmingham Heartlands Hospital entry as all trainees will be working cross site regularly.

Hospital	Good Hope Hospital
Address	Rectory Road, Sutton Coldfield, West Midlands B75 7RR
Transport/parking	Onsite close to maternity block

Quote from the	"Our unit is a sought after busy tertiary level unit with plenty of training

college tutor	<p>opportunities and scope to develop your area of interest. We have a good track record of successful completion of ATSM's and progression to consultant grade. The unit has been successful in trainees progressing onto a subspecialty training post. We offer subspecialty training in Gynae-Oncology with training opportunities in all other subspecialty areas such as FM, subfertility and urogynaecology. The unit is a laparoscopic teaching hub. We are a friendly unit with a commitment to support learning and training augmented by 96 hour Consultant presence on LW." Ms Valarmathy Kandavel</p>

Quote from the college tutor	<p>“SATH is the only trust in the region with 24/7 resident consultants which maximizes directly supervised training and achievement of WBAs. You will work in a supportive and friendly environment. This unit has a good balance of workload and vast opportunities in different specialties. Our rota is balanced, flexible and closely monitored for equality and fairness. We have monthly governance and audit meetings where all clinical activity is cancelled to facilitate your attendance. National surveys highlight our good clinical and educational supervision. Every junior trainee is assigned a senior trainee as a mentor. Your concerns will be listened to and addressed via our regular JDF meetings led by trainees. Most of our trainees enjoy their placement in SATH and many choose to stay for a second year.” Ms. Nasreen Soliman</p>																

Royal Stoke University Hospital

Hospital	Royal Stoke Hospital
Address	(Main) Royal Stoke University Hospital, Newcastle Road, Stoke on Trent, ST4 6QG (Secondary) County Hospital, Weston Road, Stafford, ST16 3SA

<p>TEF Indicator 12: Overall recommendation</p>	<p>Indicator 12 – Overall recommendation: 66.67</p> <p>Rank: 9</p> <p>N: 15</p> <p><u>Underlying questions to Indicator 12 – Overall recommendation (will not appear if N is small)</u></p>  <p><u>Current Trainees' quotes:</u></p> <ul style="list-style-type: none"> -Everyone is very approachable especially the senior registrars! -We are a nice team! -Lots of the seniors are very supportive, happy to teach and get me involved, which I really appreciate. -Training is wonderful. -Induction was good. -I feel well supported. Most consultants are easily accessible. -Good variety of sessions available to attend. -Stoke is a very busy unit that offers a variety of sessions specially gynaecology theatres and outpatient procedures offer great learning opportunities. Consultants are approachable and accessible. The supervision and support I had for my ATSMs was amazing. -The midwives are a great bunch. -The monthly teaching is good and well organised. -It's a friendly work atmosphere. -Good exposure to high-risk complex obstetrics and gynaecology cases. -Despite tough times in the NHS, and the stressors in the department, it feels that we all work well as a team to support one another and lift each other up. -Since starting at UHNM I've had so much more gynaecology theatre time and all the senior registrars are so supportive and keen to get trainees involved.
<p>Quote from the college tutor</p>	<p>"UHNM is a busy unit with a wide variety of interests to easily support training for the core curriculum and most ATSMs. Our unit has about 7000 deliveries a year and a receiving center for complex cases of abnormal placentation such as placenta accreta. This provides training opportunities that might not be available in some other units. UHNM is known for its Gynaecological surgical opportunities. We often run training theatre lists where cases are listed to accommodate training requirements. We have a simulation to support laparoscopic and ultrasound training.</p>

	<p>At our monthly junior doctors' forum, trainees have opportunity to raise and discuss any issues to the college tutors and management team. This is usually followed by teaching for junior doctors which is supported by one of our consultants. We have an annual prize day where trainees present case reports and research/ audits.</p> <p>We have a friendly, approachable and supportive team of consultants who are keen to teach." Miss Sa'adatu Usman</p>

Quote from the college tutor	<p>Walsall provides an excellent training environment in which to develop and consolidate laparoscopic skills. Registrars can develop confidence in managing delivery suite. Our antenatal clinics are ordinarily staffed by consultants and SHOs, which maximises other training opportunities for O&G trainees. Our consultants are friendly, approachable and committed to training and developing our doctors in training. Most of the consultants trained within the West Midlands, with 6 of us achieving CCT within the last 5 years (we remember the challenges of being a trainee) – Mr. Paul Woollett</p>
