Case discussed (brief description):

Presentation:

Expected behaviours		Successful / Unsuccessful / Not observed
Record keeping	Records should be legible and signed. Should be structured and include provisional and differential diagnoses and initial investigation & management plan. Should record results and treatments given.	<input type="radio"/> Successful <input type="radio"/> Unsuccessful <input type="radio"/> Not observed
Review of investigations	Undertook appropriate investigations. Results are recorded and correctly interpreted. Any Imaging should be reviewed in the light of the trainees interpretation	<input type="radio"/> Successful <input type="radio"/> Unsuccessful <input type="radio"/> Not observed
Diagnosis	The correct diagnosis was achieved with an appropriate differential diagnosis. Were any important conditions omitted?	<input type="radio"/> Successful <input type="radio"/> Unsuccessful <input type="radio"/> Not observed

Treatment	Emergency treatment was correct and response recorded. Subsequent treatments appropriate and comprehensive	<input type="radio"/> Successful <input type="radio"/> Unsuccessful <input type="radio"/> Not observed
Planning for subsequent care (in patient or discharged patients)	Clear plan demonstrating expected clinical course, recognition of and planning for possible complications and instructions to patient (if appropriate)	<input type="radio"/> Successful <input type="radio"/> Unsuccessful <input type="radio"/> Not observed
Clinical reasoning	Able to integrate the history, examination and investigative data to arrive at a logical diagnosis and appropriate treatment plan taking into account the patients co morbidities and social circumstances	<input type="radio"/> Successful <input type="radio"/> Unsuccessful <input type="radio"/> Not observed
Patient safety issues	Able to recognise effects of systems, process, environment and staffing on patient safety issues	<input type="radio"/> Successful <input type="radio"/> Unsuccessful <input type="radio"/> Not observed
Overall clinical care	The case records and the trainees discussion should demonstrate that this episode of clinical care was conducted in accordance with good clinical practice and to a good overall standard	<input type="radio"/> Successful <input type="radio"/> Unsuccessful <input type="radio"/> Not observed
Overall	Auto-calculated from above outcomes. If all items are marked as Successful , this will rate Successful. If any column is rated as Unsuccessful or more than 2 columns are rated as Not observed , this will be rated as Unsuccessful.	<input type="radio"/> Successful <input type="radio"/> Unsuccessful
