FY1 Job description

The Trust is one of the largest teaching Trusts in the United Kingdom with a reputation for excellent, friendly staff who provide high quality care from three hospitals:

- City Hospital in Birmingham
- Sandwell General Hospital in West Bromwich
- Rowley Regis Community Hospital in Rowley Regis

The Trust was established in April 2002 and has an income of £365 million. It employs almost 6400 WTE staff, has circa 800 beds and serves a population of over 500,000.

Sandwell General Hospital and City Hospital are busy acute hospitals providing many specialist services and a broad range of emergency services, including Accident & Emergency at both sites. Rowley Regis Community Hospital provides rehabilitation and a wide range of outpatient and diagnostic services.

The Trust is a key partner along with local PCTs and local authorities in the “Right Care Right Here” programme which seeks to deliver an ambitious redevelopment of local health services. This has the backing of the West Midlands Strategic Health Authority and has been approved as a national priority scheme by the Department of Health. Following a very successful public consultation, implementation of the programme is underway with a wide range of secondary care services now being provided via new models of care in community locations. The programme includes one of the largest investments in the UK in new facilities in both the acute and community sectors. Included within this is a brand new state of the art acute hospital which has both business case approval and planning permission. The new hospital is set to open in 2015/16. This will create some of the largest clinical teams in the country on a single site.

The Trust’s current strategy focuses on the period leading up to the new hospital with an emphasis on driving clinical integration by reconfiguration of services between the existing sites, strengthening key specialties and on quality and productivity improvement. In the light of its strategic, operational and financial strength the Trust is applying to become a NHS Foundation Trust.

The Trust is a pioneer in developing new and more effective approaches to staff engagement through its “Listening into Action” programme which harnesses the energy and ideas of front line staff to improve services. This is the largest programme of its kind in the NHS and has received widespread national recognition.

The Birmingham Treatment Centre opened on the City Hospital site in November 2005. This £35m development provides state of the art facilities for
BIRMINGHAM FOUNDATION SCHOOL

one-stop diagnosis and treatment. It includes an Ambulatory Surgical Unit with six theatres, extensive imaging facilities, an integrated breast care centre and teaching accommodation.

A new £18m Emergency Services Centre opened on the Sandwell site in April 2005. It incorporates a comprehensive A&E facility, Emergency Assessment Unit and Cardiac Care Unit. The model of care has been developed with primary care to provide a fully integrated service.

The Trust hosts the Birmingham and Midland Eye Centre which is a supra-regional specialist facility, as well as the Pan-Birmingham Gynaecological Oncology Centre, Birmingham Skin Centre and Sickle Cell and Thalassaemia Centre.

Aside from being one of the largest providers of acute patient services in the Midlands, the Trust also has a substantial teaching and research agenda with several academic departments including rheumatology, ophthalmology, cardiology, gynaecological oncology and neurology.

Foundation Year 1 Rotations

Sandwell Hospital offers 33 posts at FY1 level in 11 rotations, comprising 3 x 4 month posts. All rotations include at least 4 months medicine and 4 months surgery. The jobs are busy, but well supported and provide excellent experience at Foundation level.

</table>
There is a regular teaching programme on Wednesday lunchtime for all FY1s with lunch starting at 12.30pm. Attendance at teaching (and evaluation of the programme) is recorded and this counts towards the final validation of training.

Each subspecialty has its own teaching and education programme in addition to the generic programme. All trainees have a named Educational Supervisor and are required to complete regular appraisals. The F1 assessment tools need to be completed as per the requirements of the foundation portfolio. Electronic 360 degree appraisal is part of the first rotation. Validation of all paperwork is carried out twice a year by the Clinical Tutor.

**Study Leave**

As per the Deanery guidelines, study leave funding is not available at FY1 level. However study leave can be used for up to 5 days in a ‘Taster specialty’ in the third 4 month period only, if agreed by the Educational Supervisor and Clinical Tutor, to help with career choice. This is then taken from the FY2 allowance. Individual careers counselling is also provided by the Clinical Tutor and Specialty Advisors.

**The “Mess”**

Sandwell Junior Doctors Mess is located within a 5 minute walk from all wards. It is on the main Sandwell site and has recently relocated so that it is not situated in the old Nurses’ Home and therefore can be accessed from within the main Hospital.

The Mess offers a range of services for its fee-paying members. There are three rooms including a fully equipped kitchen (microwave, electric cooker,
toaster, kettle, a fridge/cupboard that contains milk, bread and cereal). Newspapers are delivered every weekday and SKY TV has been installed. Discussions are ongoing regarding additional facilities that may be installed in the near future, including Table Football, Darts Board, Wii, etc.

Pharmaceutical Representatives are encouraged to attend weekly Monday lunchtime meetings to provide lunch when possible.

Social events / Mess Parties are organised monthly / alternative months according to demand and availability of funding. For those who do not drink / prefer not to be out late general mess events like meals, bowling, paint balling are also organised.

The Mess is run by current doctors at the Trust and mess fees are taken out of monthly pay unless you opt out. Currently the fees are £12 / month. By opting out you accept that you cannot use the mess building itself and will not be allowed to attend mess events. For those doctors who have placements split between City and Sandwell during the year, payments will need to be made to one committee only.

For further information please do not hesitate to contact the mess President, Dr Mel Pinder:

#### Educational Opportunities

- Twice Daily consultant ward rounds on ITU
- Weekly Consultant Pain ward rounds within anaesthetic placement
- Daily Preoperative ward rounds with Consultant (and/or SpR’s) for elective theatre lists, in conjunction with attendance in theatre providing anaesthetic support during surgery.
- Attendance at Multidisciplinary Pain clinics.
- Attendance at weekly departmental educational meetings, (CPD approved)
- Regular attendance at tutorials for anaesthetics (Wed pm) and CCS SHO teaching (Fridays) including weekly F1 Teaching (Tuesday lunchtime with food)
- Mandatory attendance at Multidisciplinary Pain Study days at least 1/year.

**Participation on the acute surgery on call rota**

#### Additional Specific Conditions

- Anaesthesia for elective General Surgery, Plastics, Gynaecology, trauma and orthopaedics, ENT, Urology, Vascular and Day case surgery at BTC with a 4 week placement on Intensive Care with Acute and Chronic Pain exposure at clinics and ward rounds
- Not required to attend Ophthalmology lists at BMEC or Obstetric Unit.

#### Additional Procedures

- Regional techniques e.g. Epidural and Spinal anaesthesia,
- Peripheral Nerve blocks with use of nerve stimulators and Ultrasound guidance
- General anaesthesia for ASA1/2 surgical cases under direct supervision of an anaesthetist.
- Advanced airway techniques including fibre optic intubation,
- Manage and implement Patient Controlled Analgesia (PCA) for postoperative patients
- Advanced methods of mechanical ventilation, cardiac monitoring with cardiovascular support and renal replacement therapy on Intensive Care placement.
<table>
<thead>
<tr>
<th>Notes</th>
</tr>
</thead>
</table>
| • FY1’s will be expected to provide Case presentations and management plans on wards, Intensive Care and Pain Management placement. The trainee will be proficient in history taking and preoperative preparation of patients for elective surgical lists, manage acute pain with Specialist Nurse support.  
• They will be confident in airway management skills, intravenous access and fluid therapy, manage acute pain postoperatively with Patient controlled and Epidural analgesia and be able to provide general anaesthesia, under direct supervision of an anaesthetist, for ASA1/2 patients having simple procedures. |

MAIN TERMS AND CONDITIONS OF SERVICE

The post is covered by the national (Whitley Council) Terms and Conditions of Service for Hospital Medical and Dental Staff (England and Wales), as amended from time to time.

The annual leave for these posts is 28 days per annum, pro rata, plus bank holidays. Annual leave is granted with the approval of the supervising Consultant and Medical Staffing department. Prospective cover arrangements are in place in relation to annual and study leave.

Currently on call commitments (and therefore banding) of all foundation trainees are compliant with EWTD 2009 regulations.

It is the responsibility of all medical staff to ensure that they are appropriately registered with the General Medical Council. *If registration lapses, employment may be terminated.*

The successful candidate will be required to undergo pre-employment medical screening by our Occupational Health Department and Criminal Record Bureau checks. You will also be expected to provide evidence of immunity against ‘Hepatitis B’.

Under the Statutory Instrument 778 Health and Safety Radiation Protection of Patients, employers have an obligation to ensure that any person clinically or physically directing medical radiation exposures have received adequate training. It is therefore, expected that you should submit to the Personnel Department a copy of your certificate or attendance at an appropriate course, if required.

All employees are expected to be aware of and comply with appropriate Trust policies covering such areas as Health and Safety, Equal opportunities, Data Protection, Confidentiality and Smoking.

ACCOMMODATION

Single accommodation at Sandwell Hospital is provided, subject to availability, in the form of individual bed sitting rooms. Sanitary facilities and bathroom accommodation is shared and there is provision of a common sitting room and dining facilities.

On call rooms keys for most specialties are available on request. Please contact Jenny Nardon on Ex 3240 bleep 6289

OTHER FACILITIES
- Junior Medical Staff have their own Mess Room with pool table.
- Sandwell Hospital has its own cash point banking facilities.
- Car parking is available. A regular Trust shuttle bus service runs between City and Sandwell hospitals.
- There is a fully equipped subsidised staff gym

September 2011
